

Becopad

Other Names

Filter Sheet

Description

American Tartaric is happy to announce that we recently became an authorized representative for Begerow. Begerow is the manufacturer of Depth Filter Media as well as various filtration systems. They recently introduced a totally new concept in pad filtration: Becopad. Becopads are the result of a 5 year R&D project with the goal of creating a pad that has sustainability, provides added value, and is more cost effective. Please contact us for more information.

Properties

- Can be back- flushed easily and repeatedly
- Fully compostable
- Reduction in drip losses of 90%
- No Diatomaceous Earth – completely D.E. free
- No need to “sweeten” with Citric Acid – just use plain water
- No “card board” taste
- Zero off flavors

Directions for use

For filtration & clarification. Depending on application, consult with your ATP representative.
