

Egg Albumin

Category

Cellar Chemicals

Product Name

Egg Albumin

Other Name

Ovo-Pure

Description

Ovo-Pure is a spray dried egg albumin obtained from fresh eggs. A special atomization process produces a very pure dry powder.

Ovo-Pure is designed to combine with polyphenols and unstable anthocyanins eliminating astringent tannins and the oxidizable color matter which precipitate in the bottle.

It is recommended for applications where gelatin or casein are too aggressive.

Directions for use

Can be added at any stage of the winemaking process to reduce astringency.

Hazard Warning

See MSDS

Packaging

1 Kg Packet, 10 Kg and 25 Kg Bag
