

Fumaric acid

Category

Cellar Chemicals

Product Name

Fumaric acid

Other Name

None

Description

Fumaric acid can be used as a substitute for Tartaric Acid. It is an economical alternative to acidify wine with no detectable difference in flavor. Due to its strong buffering capacity it has the ability to lower pH with less impact on TA.

Directions for use

At any stage during the winemaking process, especially prior to bottling.

Hazard Warning

See MSDS

Packaging

25 Kg Bags.
