

PVPP – V

Category

Cellar Chemicals

Product Name

PVPP – V

Other Name

Polyvinylpolypyrrolidone, Polyclar V

Description

- » Highly effective 100% PVPP wine stabilizer with an average particle size of 25 microns.
- » Optimized for maximum, fast-acting reduction of polyphenols, such as the leucoanthocyananadins and catechins that may cause “pinking” and “browning” through oxidative polymerization.

Application

Can be added at any stage of winemaking process.

Packaging

44 lb Drum.
