

Polyclar Super R

Other Names

PVPP, Polyvinylpolypyrrolidone, Cross-linked polyvinylpyrrolidone

Description

Polyclar Super R is a very effective 100% PVPP beer stabilizer. It is optimized for regeneration use, either on its own, or in conjunction with other stabilizers, offering a highly effective means of preventing non-biological haze in all types of beer.

Properties

- achieves maximum shelf life in beer
- no negative impact on foam or flavor
- applicable to all types of beer
- very high efficacy – using low dosage rates
- easy to use – optimized for regeneration units
- applicable in most PVPP regeneration filter systems
- 100% PVPP – insoluble in beer
- effective and highly selective removal of haze-producing polyphenols
- no additives labeling required – completely removed

Directions for use

Exact dosage rate is dependent on the brewing materials used, process conditions, other stabilizers in use, and the shelf life requirement. Use of Polyclar Super R requires dedicated equipment. It can be used in conjunction with silica based beer stabilizers. It is made up as an 8 to 12% slurry in de-aerated water in a slurry tank equipped with an agitator.

Hazard Warning

see MSDS

Dosage

See above comments, please contact your sales representative for additional information.

Packaging

50 lb drum
