

Polyclar V

Category

Cellar Chemicals

Product Name

Polyclar V

Other Name

Polyvinylpolypyrrolidone

Description

- » Polyclar V is a highly effective 100% PVPP wine stabilizer with an average particle size of around 25 microns.
- » It is optimized for maximum, fast-acting reduction of polyphenols, such as the leucoanthocyananidins and catechins, that may cause “pinking” and “browning” through oxidative polymerization.

Directions for use

Can be added at any stage of the winemaking process.

Hazard Warning

See MSDS

Packaging

44 lb Drum.
