

# Propylene Glycol

## Other Names

Propane-1,2-diol; 1,2-Propanediol

## Description

Propylene Glycol is a colorless, odorless liquid with a wide range of uses. In the wine industry its typical application is in solution with water to produce a coolant for refrigeration units for heat transfer fluids.

## Properties

- our propylene glycol fluids have low acute oral toxicity
- can be used in applications where food or beverage contact could occur
- pH of solution (50% glycol): 9.0 – 10.0

## Directions for use

Used primarily as a refrigerant. Recommended use temperature range: -50 deg F to 250 deg F.

## Hazard Warning

See MSDS

## Dosage

None

## Packaging

483 lb (55 gal) Drum
