

Sodium Chloride

Category

Cellar Chemicals

Product Name

Sodium Chloride

Other Name

NaCl – commonly known as salt

Description

- Sodium chloride is often used to reduce the concentration of calcium, magnesium and other ions in hard water.
- The “hardness ions” can cause a variety of undesired effects like the build up of scale which can foul lines and pumps in wineries.
- As well as interfering with the cleaning action of basic winery cleaners.

Directions for use

For use in water softening units.

Hazard Warning
