

Sodium Percarbonate

Category

Cleaners

Product Name

Sodium Percarbonate

Other Names

None

Description

Sodium Percarbonate is a white odorless, crystalline powder which when added to water releases hydrogen peroxide, a powerful disinfectant. It has a variety of uses, since it is approved for use around food it is a natural choice for use on barrels, presses, lines and pipes, tanks and other winery equipment.

Directions for use

Barrels : Wash barrels to remove any residue and thoroughly spray a hot solution containing 0.5-1.0 oz per gallon of Sodium Percarbonate in the barrels. Rinse with clean water spray. **BE SURE THE SODIUM PERCARBONATE IS DISSOLVED.** An alternative method recommended for barrels is to wash the barrel, then leave a cold solution containing 0.2-0.6 oz per gallon to soak for 2-3 hours. Rinse with clean water spray. **Tanks, Storage vessels :** Use Sodium Percarbonate into the normal wash cycle at 0.5 oz per gallon as a separate wash step. Rinse with cold water. **Lines :** Lines should be initially cleaned with water. A hot water wash containing 1 oz per gallon should be part of the regime followed by a water rinse.
