

Yeastade-50

Other Names

Yeast Nutrient

Description

Yeastade-50, formerly Tastone-50 is pure yeast in dry powder form with no additives. All vitamins, minerals, and proteins are derived from yeast. Additives, such as urea, are not used in the production of this product. Primary grown yeast has been partially autolyzed, then pasteurized and dried at high temperatures, to yield high nutrient availability with no fermentation activity. The result is the availability of the whole yeast protein which has been converted to polypeptides, lower molecular weight peptides, and amino acids. This product is used to treat specific deficiencies caused by nitrogen poor fruit, and may help prevent stuck fermentations, but it should be added prior to yeast inoculation. Kosher, except for Passover.

Properties

- All vitamins minerals and proteins are derived from yeast
- Pure yeast in dry powder form with no additives

Directions for use

Suspend dose in 5 parts of water and add to the must.

Hazard Warning

Powder can cause a light irritation of mucous membranes, skin and eyes.

Dosage

2 lb of Yeastade-50 per 1000 gallons of must or juice

Packaging

50 lb Box
