

Zyme-O-Aroma Plus Liquid

Other Names

None

Description

Zyme-O-Aroma Plus Liquid is a pectinase preparation with high secondary activities such as β -glucosidase and arabinosidase produced by classic fermentation of selected strains of *Aspergillus niger*. Zyme-O-Aroma Plus has significant β -glucosidase activity. It has been especially developed to enhance the aroma formation from the terpenic precursors of the grapes in the production of white wines.

Properties

- Zyme-O-Aroma Plus is standardized at an activity of 2000 β GLU/g.
- Heavy metals < 30 ppm (as Lead)
- Density 1.1-1.25
- pH 3.5-5.0
- Available as a Liquid

Directions for use

Zyme-O-Aroma Plus Liquid can be diluted in a small quantity of cool water before addition in the tank. This allows for optimal dispersion. Add towards the end of primary fermentation to the tank to maintain and enhance aromatic characters.

Hazard Warning

Eye protection is recommended. In case of contact with eyes, rinse thoroughly with water.

Dosage

24-60 mls/Ton

130 -330 mls / 1000 gals

Packaging

10 & 25 kg Drums
