

Zyme-O- Reductase XL

Other Names

None

Description

Zyme-O- Reductase XL is a cellulose preparation obtained from the submerged fermentation of *Trichoderma longibrachiatum*. The product finds an application in the alcohol industry and assists in reducing the viscosity. Zyme-O- Reductase XL also contains some β -glucanase and arabinase side activities as well.

Application

Zyme-O- Reductase XL hydrolyzes the endo-1,4- β -glucan, endo-1,3- β -D-glucan and the endo-1,4- β -D-xylan linkages found in wheat and other cereals. The product is a liquid preparation and contains the enzyme protein stabilised with glycerol (E 422) in water.

Zyme-O- Reductase XL has been standardized at 7,000 I units /g.

Packaging

25 kg Drums and 1000 kg IBC containers.
