

## TANNINS

## Tannica Bouquet

### Description

**Tannica Bouquet** is a powder comprised of a blend of condensed tannins.

### Properties

**Tannica Bouquet** is a blend of tannins extracted from wood. Due to an innovative extraction and drying process carried out at low temperatures, the molecular characteristics and reactivity are preserved, resulting in a particularly powerful antioxidant effect. Designed for addition immediately before bottling in white and rosé wines, it reduces the impression of some off-flavor compounds. Additionally, **Tannica Bouquet** protects aromatics from oxidation, especially terpenes and norisoprenoids, increasing their persistence, complexity, and intensity.

### Use

**Tannica Bouquet** is a tannin for white and rosé wines that is designed for specific late addition in wine maturation and pre-bottling.

### Dosage and Addition

**During Maturation:** 0.5–10 g/hL (0.04–0.84 lb/1000 gal)

**Pre-bottling:** 0.5–5 g/hL (0.04–0.42 lb/1000 gal)

Add **Tannica Bouquet** directly to the wine or dissolve in warm water at a ratio of 1:10. Add by means of a Venturi tube or metering pump while mixing to ensure proper homogenization.

Bench trials are recommended to ensure appropriate addition rates. Please contact your ATPGroup Enology Products Specialist for the best solution and assistance with the necessary bench trials to ensure appropriate rates.

### Storage and Shelf Life

Store in original packaging in a cool and dry environment, max 77°F (25°C). Carefully reseal any partial containers. The integrity of the product is guaranteed only if it is stored as indicated in this Technical Data Sheet.

### Packaging

**Tannica Bouquet** is available in a 1 kg bag.

Product for Enological Use Only

Non-GMO, Allergen-Free
