

## Juggernaut K

Heavy-duty foaming detergent and degreaser for food processing

### Properties

Juggernaut K is a heavy duty, foaming liquid detergent used to remove heavy buildup of carbonaceous soils in food processing fryers, cookers, hoods, smokehouses, and ovens. This product contains highly concentrated alkaline boosters and water-softening agents to increase performance and rinsing ability.

### Applications

Juggernaut K is intended for use in red meat, poultry, seafood and other processing operations.

### Physical Properties

Color	Brown, yellow clear
Scent	Odorless
Density (20 °C)	1.13 g/mL (9.42 lbs/gal)
pH	>13

### Directions for Use

Typical dilution rates will vary depending on type of soil, duration of soil on surface and other factors.

General use recommendations are as follows: dilute 2-6 fl. oz. Smokehouse per gallon water. Product can be used at ambient 160°F water. Allow detergent to circulate or soak for 3-5 minutes or longer depending on degree of soil. Afterward, use a fresh water rinse. An additional rinse with a mild acid may be needed to remove any residual alkalinity prior to the final sanitizing step. Always make sure product is compatible with surfaces being cleaned.

### Packaging

This product is available in 15 gal and 55 gal drums. Larger sizes available on request.
