

# Polargel® T

## High-Purity Bentonite for Wine Clarification

### CLEARER WINE. SMARTER FINING. BETTER OUTCOMES.

Bentonite is a trusted and essential tool in winemaking, widely used to remove proteins, improve clarity, and support overall product stability. For producers seeking even greater performance, **Polargel T is a refined, high-grade bentonite** engineered specifically for modern winemaking. It delivers efficient clarification with enhanced purity and performance.

#### Reduced heavy metal uptake

Significantly lowers lead & arsenic pickup

#### Lower addition rates

Achieves clarification at reduced dosages

#### Faster Settling

Approximately 10% faster settling time

#### Refined Performance

Improved lees compaction & filtration

### HOW IT COMPARES

Feature	Standard Bentonite	Polargel T
Heavy metal uptake	Higher	Significantly Reduced
Dosage Rate	Moderate-High	Lower Required Dose
Settling Speed	Standard	~10% Faster
Lees Compaction	Variable	Improved
Wine Loss	Higher	Reduced

**Polargel T** reflects ATPGroup's commitment to delivering innovative, high-performance solutions for winemakers. In addition to this premium bentonite, ATPGroup offers a comprehensive range of standard bentonites and complementary products designed to support every stage of wine production, from harvest to bottle-ready, including cleaning and sanitation solutions. Our team is here to help you achieve higher quality, greater efficiency, and consistent results—give us a call today.
